Your Commercial Property Due Diligence Checklist

When purchasing a commercial property undertaking thorough due diligence is paramount.

It will usually require expertise across a number of professions.

An extensive factual and legal analysis of the target asset – ie. the property or the holding company – must be completed prior to investing.

Whilst the relevant professionals will undertake the actual due diligence, it is essential that as the potential buyer you understand what aspects need to be examined.

Below, is a checklist which sets out the points of focus in commercial property due diligence.

Please note, the process is extensive and this list is far from exhaustive. The items are not listed in any particular order.
